REPORT CONCERNING A CALL ABOUT CHILDREN'S REHABILITATION CENTER, BUTLER, PA.
12/29/72

The call to the ACC-PARC Office was made by an employee of the Children's Rehabilitation Center. She said that since the strike (12/4) new aides have been hired. However, there have not been enough aides, and they have not received sufficient training. She would like somebody to look into it. Children are not being neglected, but they are not receiving the care that they had been before the strike. The inadequate care is reflected in the children's behavior. The woman who called is presently employed at the Center and not on strike. She said the Center was very well run in the past and feels the kids are regressing because of inadequate care.

*What was
done about this?
etc*
